Subject: September 19th?

Good Afternoon,

I hope the Summer has treated you well! Since we last met in June, it's been a rapidly developing situation for us given:

- the passage of the \$13M water bond in Westfield,
- the potential passage of section 8125 of H.R. 6157, which could close the loophole for Air National Guard sites and community reimbursement (<https://www.congress.gov/115/bills/hr6157/BILLS-115hr6157eas.pdf>), and
- the hint that the MA DEP is considering lowering the ORS-G (http://www.town.barnstable.ma.us/BoardsCommittees/HyannisWaterBoard/Agendas/2018/Agenda_8-21-18.pdf).

A group from Westfield and Cape Cod has arranged to be in Boston on September 19th for an afternoon meeting with EEA & DEP. Will any of you be in Boston and have some free time the morning of the 19th to discuss the possibility of PFAS ARARs, increased protection for the people on Cape Cod, and ways in which local communities, the state of MA, and the EPA can work together to address PFAS issues moving forward?

Thanks so very much, in advance.

Sincerely,
Kristen
